

TITANIC-Z

Thiamethoxam 12.6% + Lambda-cyhalothrin 9.5% ZC

Product Overview

Titanic-Z is a powerful combination insecticide containing Thiamethoxam and Lambda-cyhalothrin, designed to provide rapid knockdown and long-lasting protection against both sucking and chewing pests. It ensures healthier crop growth and improved productivity.

Mode of Action

- Dual action – Systemic + Contact activity
- Quickly absorbed and translocated within the plant
- Affects insect nervous system, causing paralysis
- Stops feeding immediately after exposure
- Provides extended residual control

Key Benefits

- Effective on both sucking & chewing pests
- Fast knockdown with long-lasting protection
- Low dose, high performance formulation
- Enhances crop vigor and yield
- Reliable control even under varying field conditions
