

SECURE-Z

(Tebuconazole 10% + Sulphur 65% WG)

Product Overview

SECURE-Z is a broad-spectrum fungicide that combines the systemic action of Tebuconazole with the contact action of Sulphur. It provides fast disease control along with long-lasting protection against a wide range of fungal diseases.

Mode of Action

- **Tebuconazole (Systemic):** Controls fungal diseases from within the plant by inhibiting sterol biosynthesis in fungi.
 - **Sulphur (Contact):** Acts on the plant surface by destroying fungal spores and preventing their spread.
- ❖ **Dual action provides better and longer-lasting disease control.**

Key Benefits

- Fast and effective disease control
- Dual action for long residual protection
- Prevents spread of fungal diseases
- Broad-spectrum fungicidal activity
- Improves crop health and productivity

Target Diseases

- Powdery Mildew • Rust • Leaf Spot
- Blight • Scab (Horticulture Crops)

Recommended Crops

Wheat, Mustard, Groundnut, Chilli, Grapes, Apple, Vegetables and other field crops

Dosage & Application

Crop	Time of Spray	Dosage/Ha (gm/ml)
Chilli	Powdery Mildew & Fruit Rot	180
