

STICKER-Z

(Silicon Based Super Spreader)

Product Overview

Sticker-Z is an advanced silicon-based super spreader and activator that helps spray solution spread quickly and uniformly on leaf surfaces. It improves the effectiveness of pesticides, fungicides, micronutrients, and bio-products by enhancing absorption and coverage. Its non-ionic nature makes it highly compatible with most agricultural spray solutions.

Mode of Action

- Reduces surface tension of spray droplets
- Ensures uniform spreading on leaf surfaces
- Improves penetration and absorption of spray solution
- Reduces spray loss caused by rain and wind
- Enhances sticking and spreading efficiency

Key Benefits

- Faster and uniform spray spreading
- Improves absorption of agrochemicals
- Enhances effectiveness of pesticides and fungicides
- Reduces wastage of spray solution
- Provides better coverage with lower quantity
- Helps improve crop protection and productivity
- Suitable for all types of crops

Recommended Use

Can be used with:

- Insecticides • Fungicides • Herbicides • Micronutrients • Bio-products

❖ **Suitable for all agricultural and horticultural crops.**

Dosage & Application

Recommended Dose:

- **5 ml per 15 liters** of spray water

Application Method:

- Mix Sticker-Z thoroughly with the spray solution before application
- Use during spraying for better spread and sticking performance

Pack Sizes:

Available in **50 ml** & **100 ml**
