

LEMBRA-Z

Chlorantraniliprole 9.3% + Lambda-cyhalothrin 4.6% ZC

Product Overview

Lembra-Z is a modern insecticide formulated with a powerful combination of Chlorantraniliprole and Lambda-cyhalothrin. It provides fast knockdown and long-lasting protection against a wide range of chewing pests, ensuring healthier crops and higher yields.

Mode of Action

- Dual action formulation – Contact + Stomach action
- Paralyzes insect muscles, leading to quick control
- Immediately stops feeding, preventing crop damage
- Provides long residual protection
- Effective even after rainfall

Key Benefits

- Fast action with long-duration control
- Highly effective at low dosage
- Protects crops during critical growth stages
- Improves crop quality and yield
- Prevents re-infestation of pests
